DETAILED ACTION

Response to Amendment

1. Applicant's arguments refer to examiner's rejection of claims 22-39. Note that claims 22-39 are newly added claims and have not been examined in the previous Office Action.
2. This application is in condition for allowance except for the following formal matters:
 - Claims 28-34, 36-39 objected to under 37 CFR 1.75 as being a substantial duplicate of claims 22-27. Note that claim 28 is a mere duplicate of claim 23. Claim 33 merely differs from claim 22 by a few words in the preamble. Claims 29-32 are mere duplicates of claims 24-27. Claims 34, 36-39 are mere duplicates of claims 23-27. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
 - The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the access probability of a last-accessed entry, the predetermined probability magnitude must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

3. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

5. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

6. Claims 22-27 are allowed.

Art Unit: 2163

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not disclose or make obvious a method of accessing an entry in a list of entries in a computer system by a start pointer that points to one of the entries in the list including statistically determining an access probability that a future access of the list will require a last-accessed entry in the list in order to provide a statistically determined entry and determining whether the access probability has a predetermined probability magnitude and overwriting the start pointer to point to the statistically determined entry so as to make the statistically determined entry the first entry accessed during future access to the list in combination with all the limitations recited in claim 22.

Claims 23-27 being further limiting and definite are also allowable.

Claim 35 would be allowable if rewritten to depend from claim 22.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Ware et al (US 5,537,573) teach cache system for prefetching wherein a pointer array is maintained and previous execution history of the processor is taken into consideration in order to prefetch data using pointers.
